

# ONE MOTION CEILING ROSE

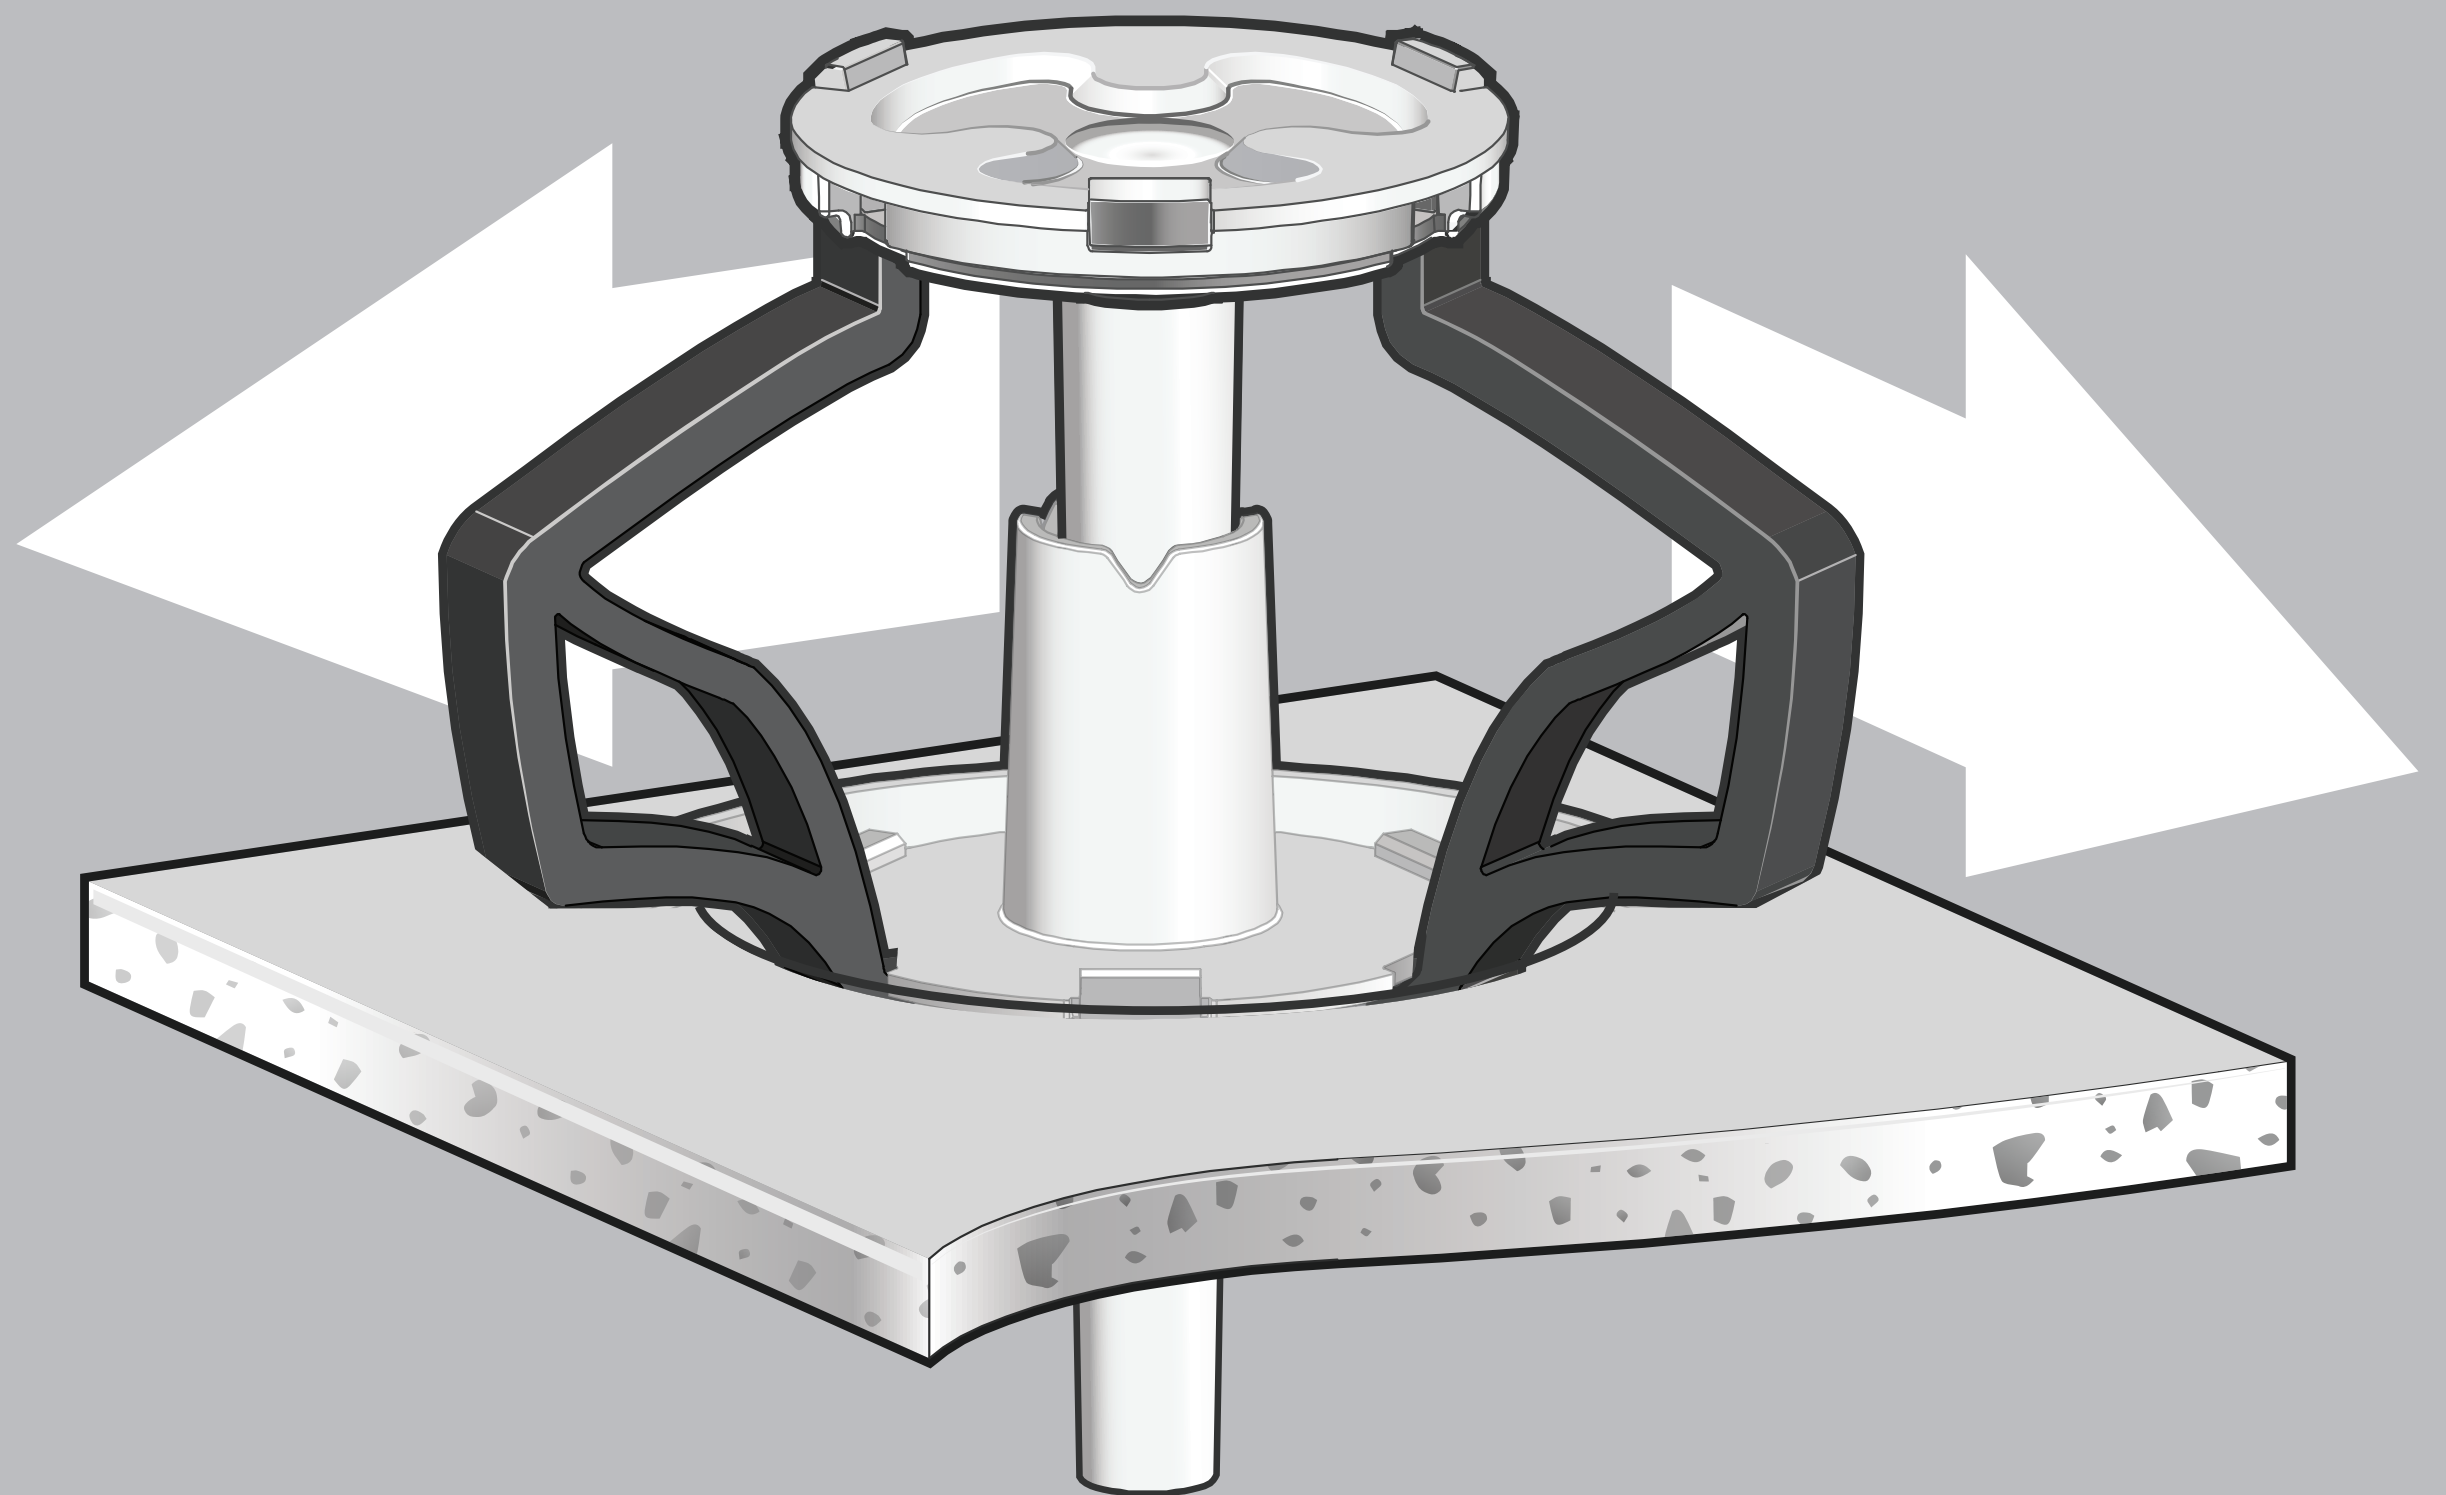

lime lite

# How Does it Work?

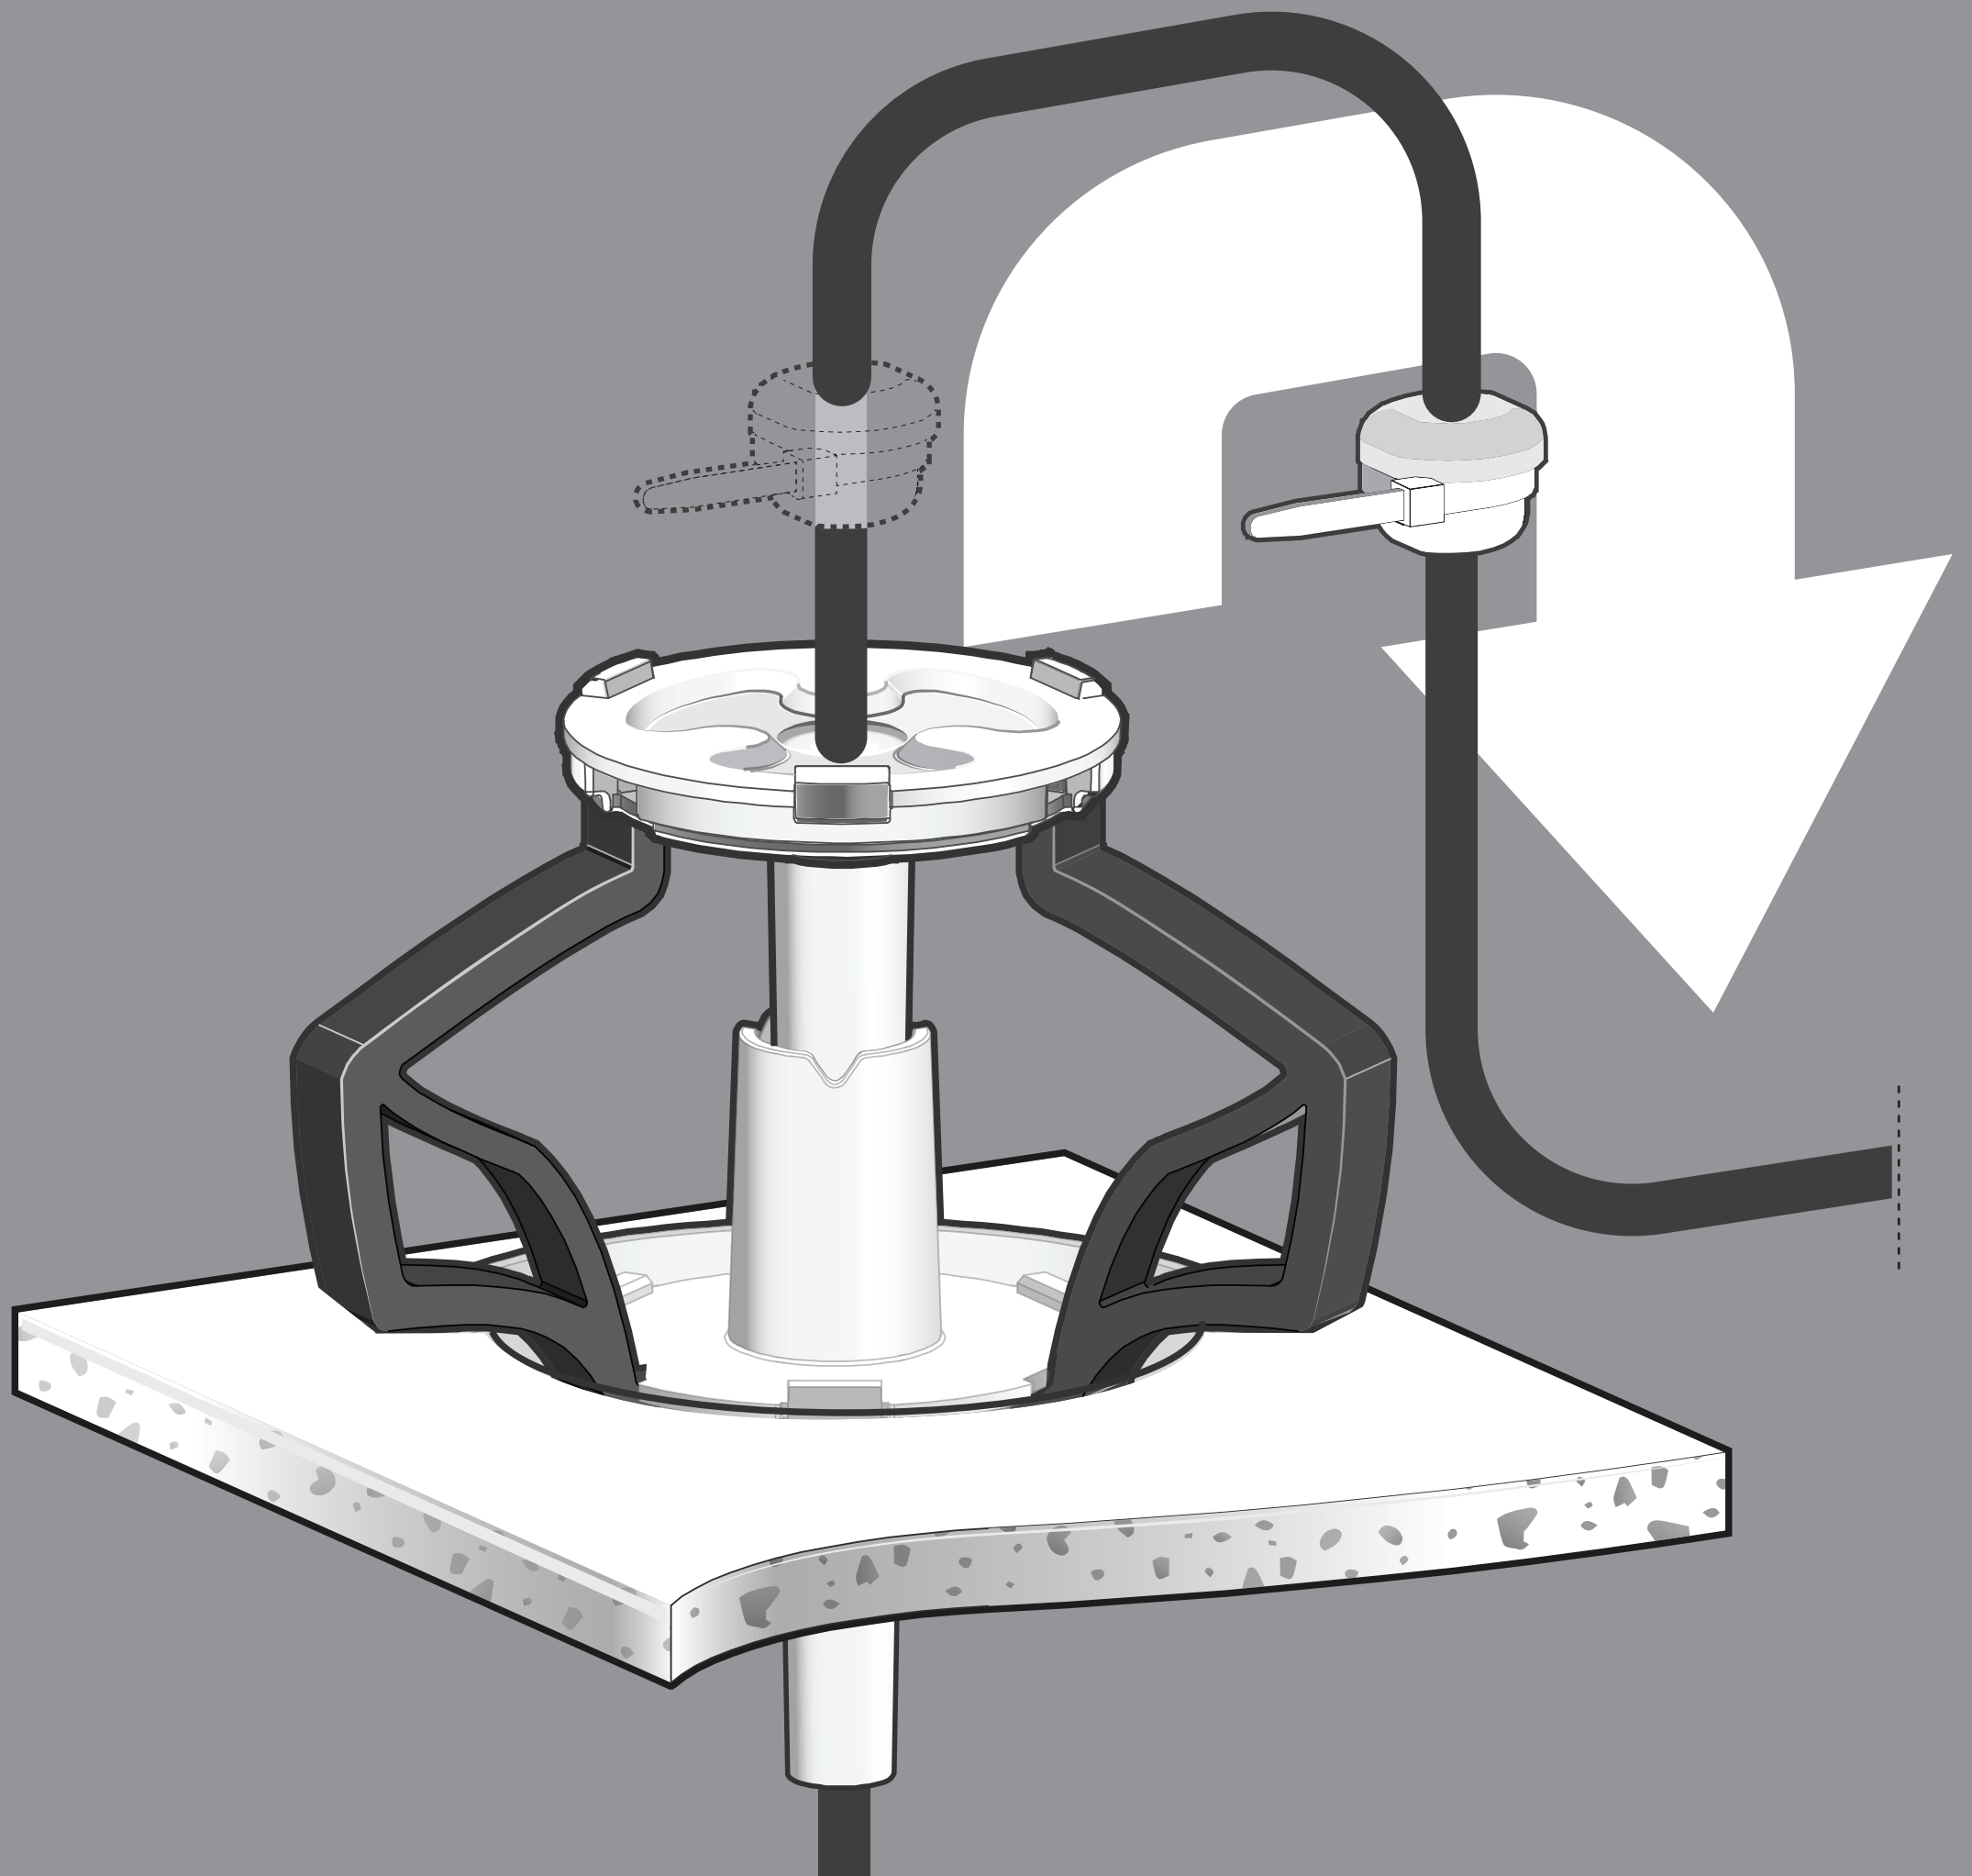

TPU injection molded rubber arms expands and elongates in geometry allowing the installer to feed the assembly through the cutout.

# How Does it Work?

Base of the the One Motion catches on the substrate,  
Rubber arms leverage itself on substrate.

# Adjusting Drop length

Adjusting is as easy relocating the cable lock.  
If a longer drop is required, feed the Cable Lock further  
along. Shortening of cable is achieved by relocating  
cable lock closer to pendant.
